AE510

Edge-side AI capabilities

- Qualcomm Octa-core processor
- 14 TOPS computing power
- Supports 4-way ethernet port cameras for visual recognition
- Support GPIO, NTC, SPK, LED, backup battery interface

InBOX710

Hot-selling item

- Rockchip RK3399 six-core high-performance processor
- Support 3G/4G/WiFi multiple network standards
- Industrial-grade design, long-lasting and stable operation
- Various peripheral interfaces

InPAD Series

7/10.1 inch touch screen

- Rockchip RK3288 quad-core processor
- All-in-one Android machine with 7-inch/10.1-inch screen
- Supports 3G/4G/WIFI multiple network standards
- Symmetrical structure design, suitable for various installation methods

InBOX730

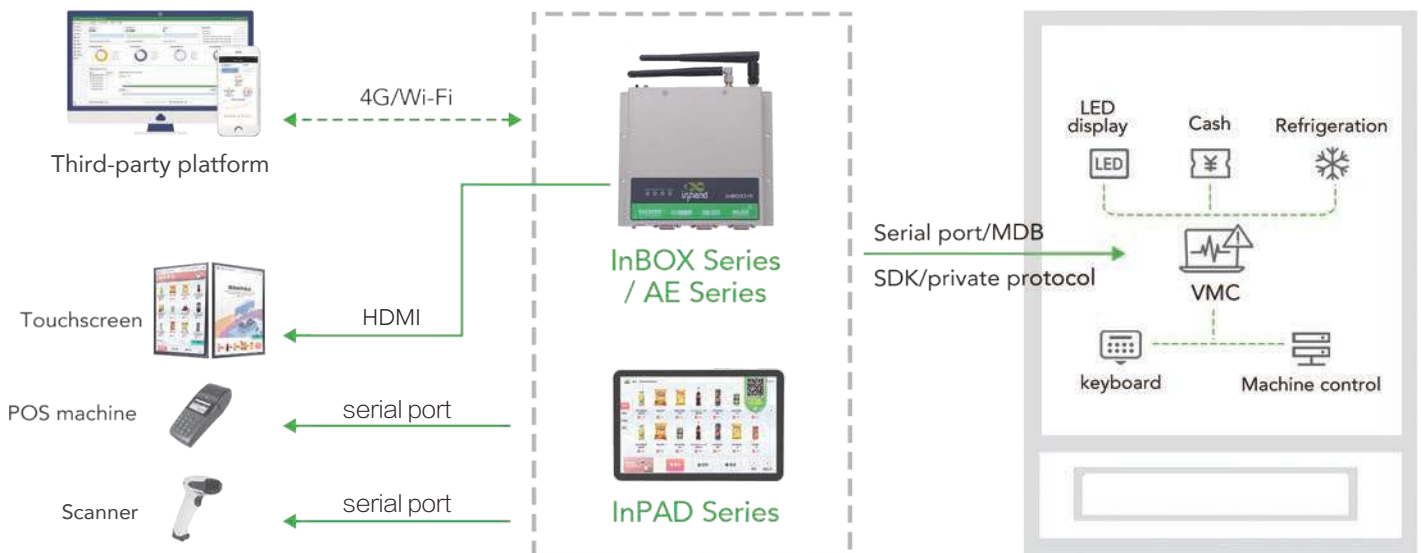

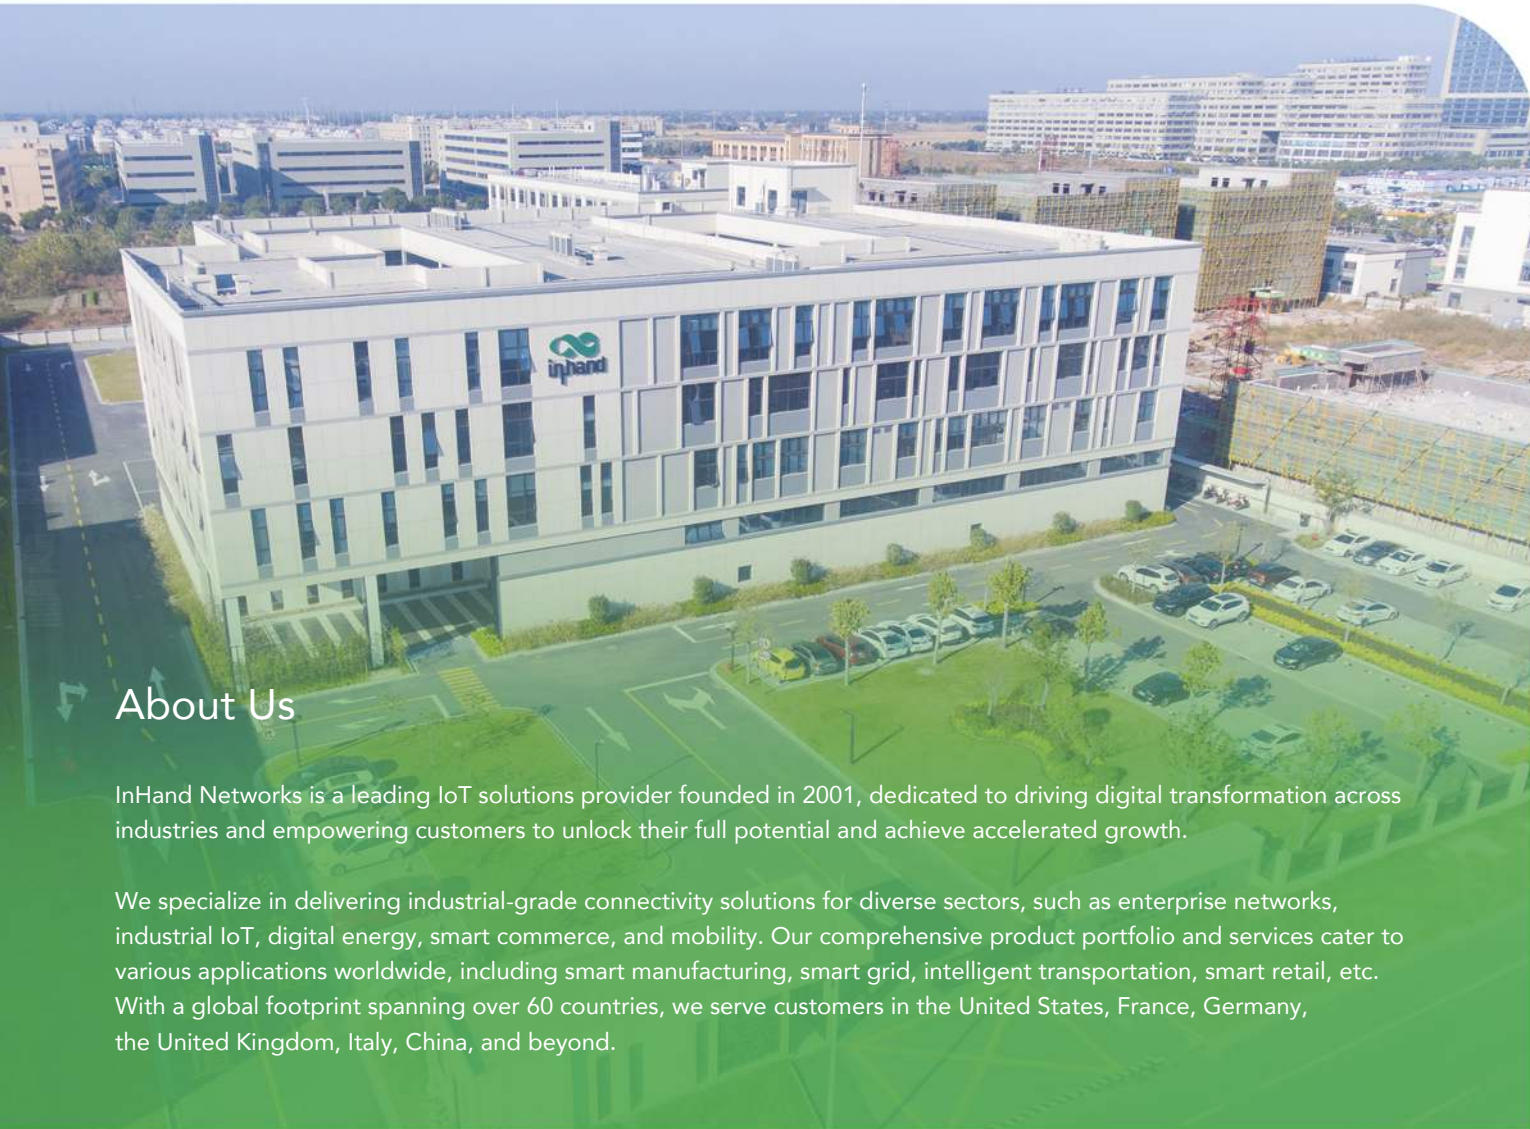

Endless possibilities

Not for sale in the U.S.

- Rockchip RK3399 six-core high-performance processor
- Support 4G, Wi-Fi, Bluetooth
- Support RS232/485, USB, HDMI, Can, GPIO, MIC, SPK
- Suitable for all types of self-service terminal applications

*All Support MDB

About Us

InHand Networks is a leading IoT solutions provider founded in 2001, dedicated to driving digital transformation across industries and empowering customers to unlock their full potential and achieve accelerated growth.

We specialize in delivering industrial-grade connectivity solutions for diverse sectors, such as enterprise networks, industrial IoT, digital energy, smart commerce, and mobility. Our comprehensive product portfolio and services cater to various applications worldwide, including smart manufacturing, smart grid, intelligent transportation, smart retail, etc. With a global footprint spanning over 60 countries, we serve customers in the United States, France, Germany, the United Kingdom, Italy, China, and beyond.

Driving the vending machine industry's development through technological innovation

With decades of experience in the self-service vending machine industry, we have continuously introduced reliable products that have gained market recognition. Leveraging our rich research and development experience and innovative mindset, we are constantly advancing the digitization of traditional vending machines, delivering a fresh shopping experience to consumers while significantly increasing the profitability of self-service vending machines.
