

Title: Full team of x86 hardware and software engineers

Type: Full-Time

Job Description:

Our company is growing! SECO InHand is seeking a TEAM of highly skilled x86 engineers. Are you and your colleagues looking for a goal-driven, rapidly growing company that considers engineering the cornerstone of its growth and value?

We are now hiring a full team of x86 hardware and software engineers to drive our R&D efforts, support custom projects, and expand our engineering capabilities.

Preference will be given to teams coming from the same organization with a proven track record of product design and development; however, individuals will be considered too.

We are looking for engineers with experience in:

- Engineering Management
- Electrical Design Engineering
- Software Engineering
- Firmware Engineering
- BIOS
- CAD/Layout (Altium Designer or Mentor Xpedition preferred)
- Systems Engineering

This team will be responsible for our US based x86 R&D, products and customers. You will also work closely with our x86 engineering and manufacturing teams located in Tuscany, Italy as well as other worldwide locations. The ability to work on ITAR projects as a US person is required.

This is an excellent opportunity for a change. Get in early on the growth of SECO USA, Inc. (dba SECO InHand). Please reach out to us to find out more or submit information about you and/or your team to jobs.us@seco.com.

About SECO InHand

SECO InHand is a leading designer of embedded systems and custom portable electronics for the Military, Medical and Industrial markets. Our expertise in design, manufacturing and product testing allow us to help our customers get to market faster and at lower cost with a custom solution that meets 100% of their requirements.

Come join our growing engineering team, with a culture that revolves around employee development and empowerment, in Rockville, MD, just outside of Washington DC. You will work on a wide range of challenging projects alongside our staff of experienced professionals. Visit our website at <http://www.seco.com/en> and www.inhand.com to see more information about our products and capabilities. Competitive compensation package and benefits offered.
